🔗 RainBoard01

Professional Summary

Senior Full-Stack Engineer with **3+ years of real-world experience** delivering enterprise-level solutions end-to-end. Proven track record of **digital transformation and crisis resolution** through centralized automation and complete traceability systems. Expert in **rapid domain adaptation**, successfully delivering complex systems across fishing/aquaculture, laboratory management, marine research, and legal recruitment industries.

Specializes in: Independent project delivery • Enterprise system architecture • Multi-cloud DevOps • Business requirements engineering • Crisis resolution

Ready for remote US work with strong English proficiency and proven remote collaboration experience.

Technical Expertise

Frontend Development

- **React Ecosystem:** React 18, TypeScript (Advanced), NextJS, Redux Toolkit, RTK Query
- **UI Libraries:** Ant Design, Mantine UI, DevExtreme DataGrid
- **Advanced Features:** i18next (4 languages), JWT auth, QR scanning, responsive design, theming

Backend Development

- **Node.js Stack:** Strapi 4.x/5.4, Express, custom controllers/services/middlewares
- **Python Stack:** FastAPI, PyMongo, package development (oplnk-python-utils)
- **Database:** PostgreSQL (Advanced SQL, CTEs, complex joins), MongoDB (aggregation pipelines)

DevOps & Cloud

- **Containerization:** Docker, Docker Compose, multi-service orchestration
- **CI/CD:** GitHub Actions, zero-downtime deployments, automated testing
- **Cloud Platforms:** AWS EC2, Digital Ocean, Azure, Vercel, CapRover, Dokploy
- **Systems:** Linux server administration, SSL certificates, load balancing, reverse proxy

Integrations & APIs

- **Authentication:** OAuth (Azure AD), JWT implementation, role-based access
- **External APIs:** Government APIs (SERNAPESCA), email services, cloud storage
- **Data Processing:** PDF parsing, Excel generation (complex templates), XML processing
- **Additional:** GraphQL (basic), React Native (learning), Kubernetes (learning)

Professional Experience

2022 – **Senior Full-Stack Engineer, Project Manager & Technical Lead, OpenLink SPA**

Present Enterprise software development for Chilean universities and corporations

Key Achievements:

- **Delivered 4 enterprise systems** solo, serving 45+ end users across multiple industries
- **Resolved critical migration issues** for SPED v2 system (future 300+ users)
- **Achieved 100% client satisfaction** on public-facing IMAR HyOPS project (verifiable: <https://hyops.ulagos.cl/app/>)
- **Reduced development timelines by 40%** through efficient full-stack ownership approach

Major Projects:

FARMAVET - Laboratory Management System | Universidad de Chile | 2022-2024

- Built enterprise lab management system for Chile's primary SERNAPESCA testing facility

- **Tech Stack:** React + TypeScript, Strapi 4, PostgreSQL, DevExtreme, i18next (4 languages)
- **Impact:** Digitized critical laboratory processes, enhanced SERNAPESCA compliance and traceability
- **Scale:** Complex entity relationships, automatic correlative systems, bulk SQL operations

IMAR HyOPS - Marine Research Data Platform | Universidad de Los Lagos | 2023

- Developed public data visualization platform for marine research (4-month delivery)
- **Tech Stack:** React 18, Strapi 4, PostgreSQL, ApexCharts, Mapbox GL, Docker deployment
- **Impact:** Enabled researchers to upload/visualize measurement data publicly
- **Verification:** Live production system at <https://hyops.ulagos.cl/app/inicio>

RECLUTA - Legal Recruitment Platform | Private Client | 2024

- Led technical architecture and development as hybrid PM/Developer
- **Tech Stack:** React + TypeScript, Vite, Mantine UI, Strapi 4, PostgreSQL
- **Impact:** Streamlined legal professional recruitment processes
- **Role:** Requirements gathering, system design, full implementation

SPED v2 - Enterprise System Migration | OpenLink SPA | 2024

- **Critical contributor** to Django → FastAPI + React migration for 300+ users
- **Contributions:** Python utilities package, complex API implementations, frontend solutions
- **Tech Stack:** FastAPI, Python 3.12, MongoDB, React + TypeScript, Mantine UI
- **Impact:** Resolved complex migration challenges, enabled modern architecture transition

2022 – **Founder & Lead Developer**, *Independent Contractor*

Present Custom software solutions for aquaculture industry

DIPROMAR - Fishing Plant Management System | Dipromar Seafood Company | 2022-Present

- **Founded and developed** complete ERP system for fishing plant operations
- **Business Impact:** Centralized all operations, eliminated manual processes, ensured complete traceability
- **Technical Leadership:** Full system architecture, requirements engineering, client training
- **Tech Stack:** React + TypeScript, Strapi 4, PostgreSQL, GitHub Actions CI/CD, CapRover deployment
- **Achievements:**
 - Resolved SERNAPESCA compliance crisis (prevented certification loss)
 - Eliminated manual Excel-based processes, implemented digital traceability
 - Zero-downtime production deployment with automated CI/CD
 - 3+ years stable production operation, ongoing feature development

Education

2024 **Ingeniero en Informática**, *Instituto Profesional INACAP*

Thesis: SMPiA - Predictive Maintenance System with ML Integration

- **Achievement:** Delivered complete microservices architecture with basic ML integration
- **Tech Stack:** Strapi 5.4, FastAPI, React + TypeScript, PostgreSQL, TensorFlow/Keras
- **Recognition:** Academic excellence in system design and rapid technology adoption

2018 – 2022 **Self-Directed Learning**

Advanced full-stack development through practical projects and continuous learning

Key Achievements & Metrics

Business Impact

- **Complete digital transformation** - eliminated manual processes across all systems
- **100% project success rate** across 5 major enterprise projects
- **40% faster delivery** through independent full-stack ownership
- **5 enterprise clients** served across diverse industries

Technical Excellence

- **90+ custom entities** modeled across all projects
- **260+ API integrations** implemented (government, cloud, third-party)
- **3 production systems** currently active with zero critical incidents

- **200,000+** lines of custom code (excluding templates/boilerplate)

Domain Expertise

- **Aquaculture/Fishing:** SERNAPESCA regulations, traceability, compliance
- **Laboratory Management:** Universidad de Chile, scientific processes
- **Marine Research:** Data visualization, scientific computing
- **Legal Tech:** Recruitment platforms, workflow optimization

Target Role Alignment

Ideal Positions: Senior Full-Stack Engineer • Solutions Engineer • System Architect (Mid) • Technical Consultant

Value Proposition:

- **Independent Delivery:** Can own projects end-to-end without hand-holding
- **Crisis Resolution:** Proven ability to solve complex problems under pressure
- **Rapid Learning:** Successfully adapted to 4+ different industry domains
- **Business Acumen:** Understands requirements engineering and value selling
- **Remote Ready:** 2+ years successful remote collaboration experience

Salary Expectation: \$95,000 - \$130,000 (open to equity discussions for the right opportunity)\$130,000 (open to equity discussions for the right opportunity)

Availability

Status: Immediately available for US remote opportunities

Work Authorization: Chilean citizen, eligible for remote contractor/employment arrangements

Time Zone: GMT-3 (flexible, proven experience with US collaboration)

English Level: Professional working proficiency *References and detailed case studies available upon request.*

Portfolio projects include both private enterprise systems and public verifiable implementations.
